ABOUT OUR COMPANY

Active Blasting (Pty) Ltd is a specialist drilling and blasting company established in 1995. The company provides practical, controlled and project-focused blasting solutions for contractors working in construction, demolition, excavation and site preparation. We have the expertise and ability to handle any blasting job and work country wide in South Africa.

Every project is approached with close attention to site conditions, access limitations, surrounding structures, existing services, construction requirements, and safety considerations.

Active Blasting strive and adhere to all Explosives Health and Safety Regulations as well as comply with all legal requirements in connection with the transportation, storage and use of explosives. Active Blasting is serious about safety and places responsible planning and controlled execution at the centre of its work.

OUR VISION

Deliver Trust and Reliability

To be a trusted drilling and blasting partner for contractors by delivering safe, controlled, reliable, and efficient solutions for construction.

Every site presents different challenges. Active Blasting considers the ground conditions, work area, access constraints, surrounding environment, project programme and required result when supporting a contractor's project.

By helping contractors address hard rock, concrete, boulders and other difficult ground breaking conditions, Active Blasting supports progress across all construction projects.

OUR MISSION

To help contractors overcome challenging rock, concrete and ground-breaking conditions through experienced, responsible and project-focused drilling and blasting services.

Active Blasting supports projects ranging from restricted blasting in sensitive or confined areas to bulk blasting on larger construction sites. Its capabilities also include rock and concrete breaking, using chemical non-explosives agent.

Our core focus is safe, controlled drilling, blasting, rock breaking, concrete breaking, trenching and demolition support.

HEALTH AND SAFETY COMMITMENT

Active Blasting treats safety as a core responsibility. Our approach is built around responsible planning, controlled work, attention to detail and protection of workers, the public, property, equipment and surrounding assets.

Safety is a fundamental part of Active Blasting's approach. Drilling and Blasting work requires careful planning, disciplined control, and respect for the risks associated with explosives, rock movement, vibration, flyrock, dust, equipment, nearby structures, and existing services.

Active Blasting is committed to carrying out work with safety as a priority throughout the project lifecycle. This commitment includes careful consideration of site conditions, coordination with contractors and site personnel, controlled work methods, protection of people and property, and clear communication of project requirements.

The specific method, controls, permits and procedures for each project must be determined by appropriately qualified and authorised personnel in accordance with applicable legislation, regulations, standards, client requirements and site rules.

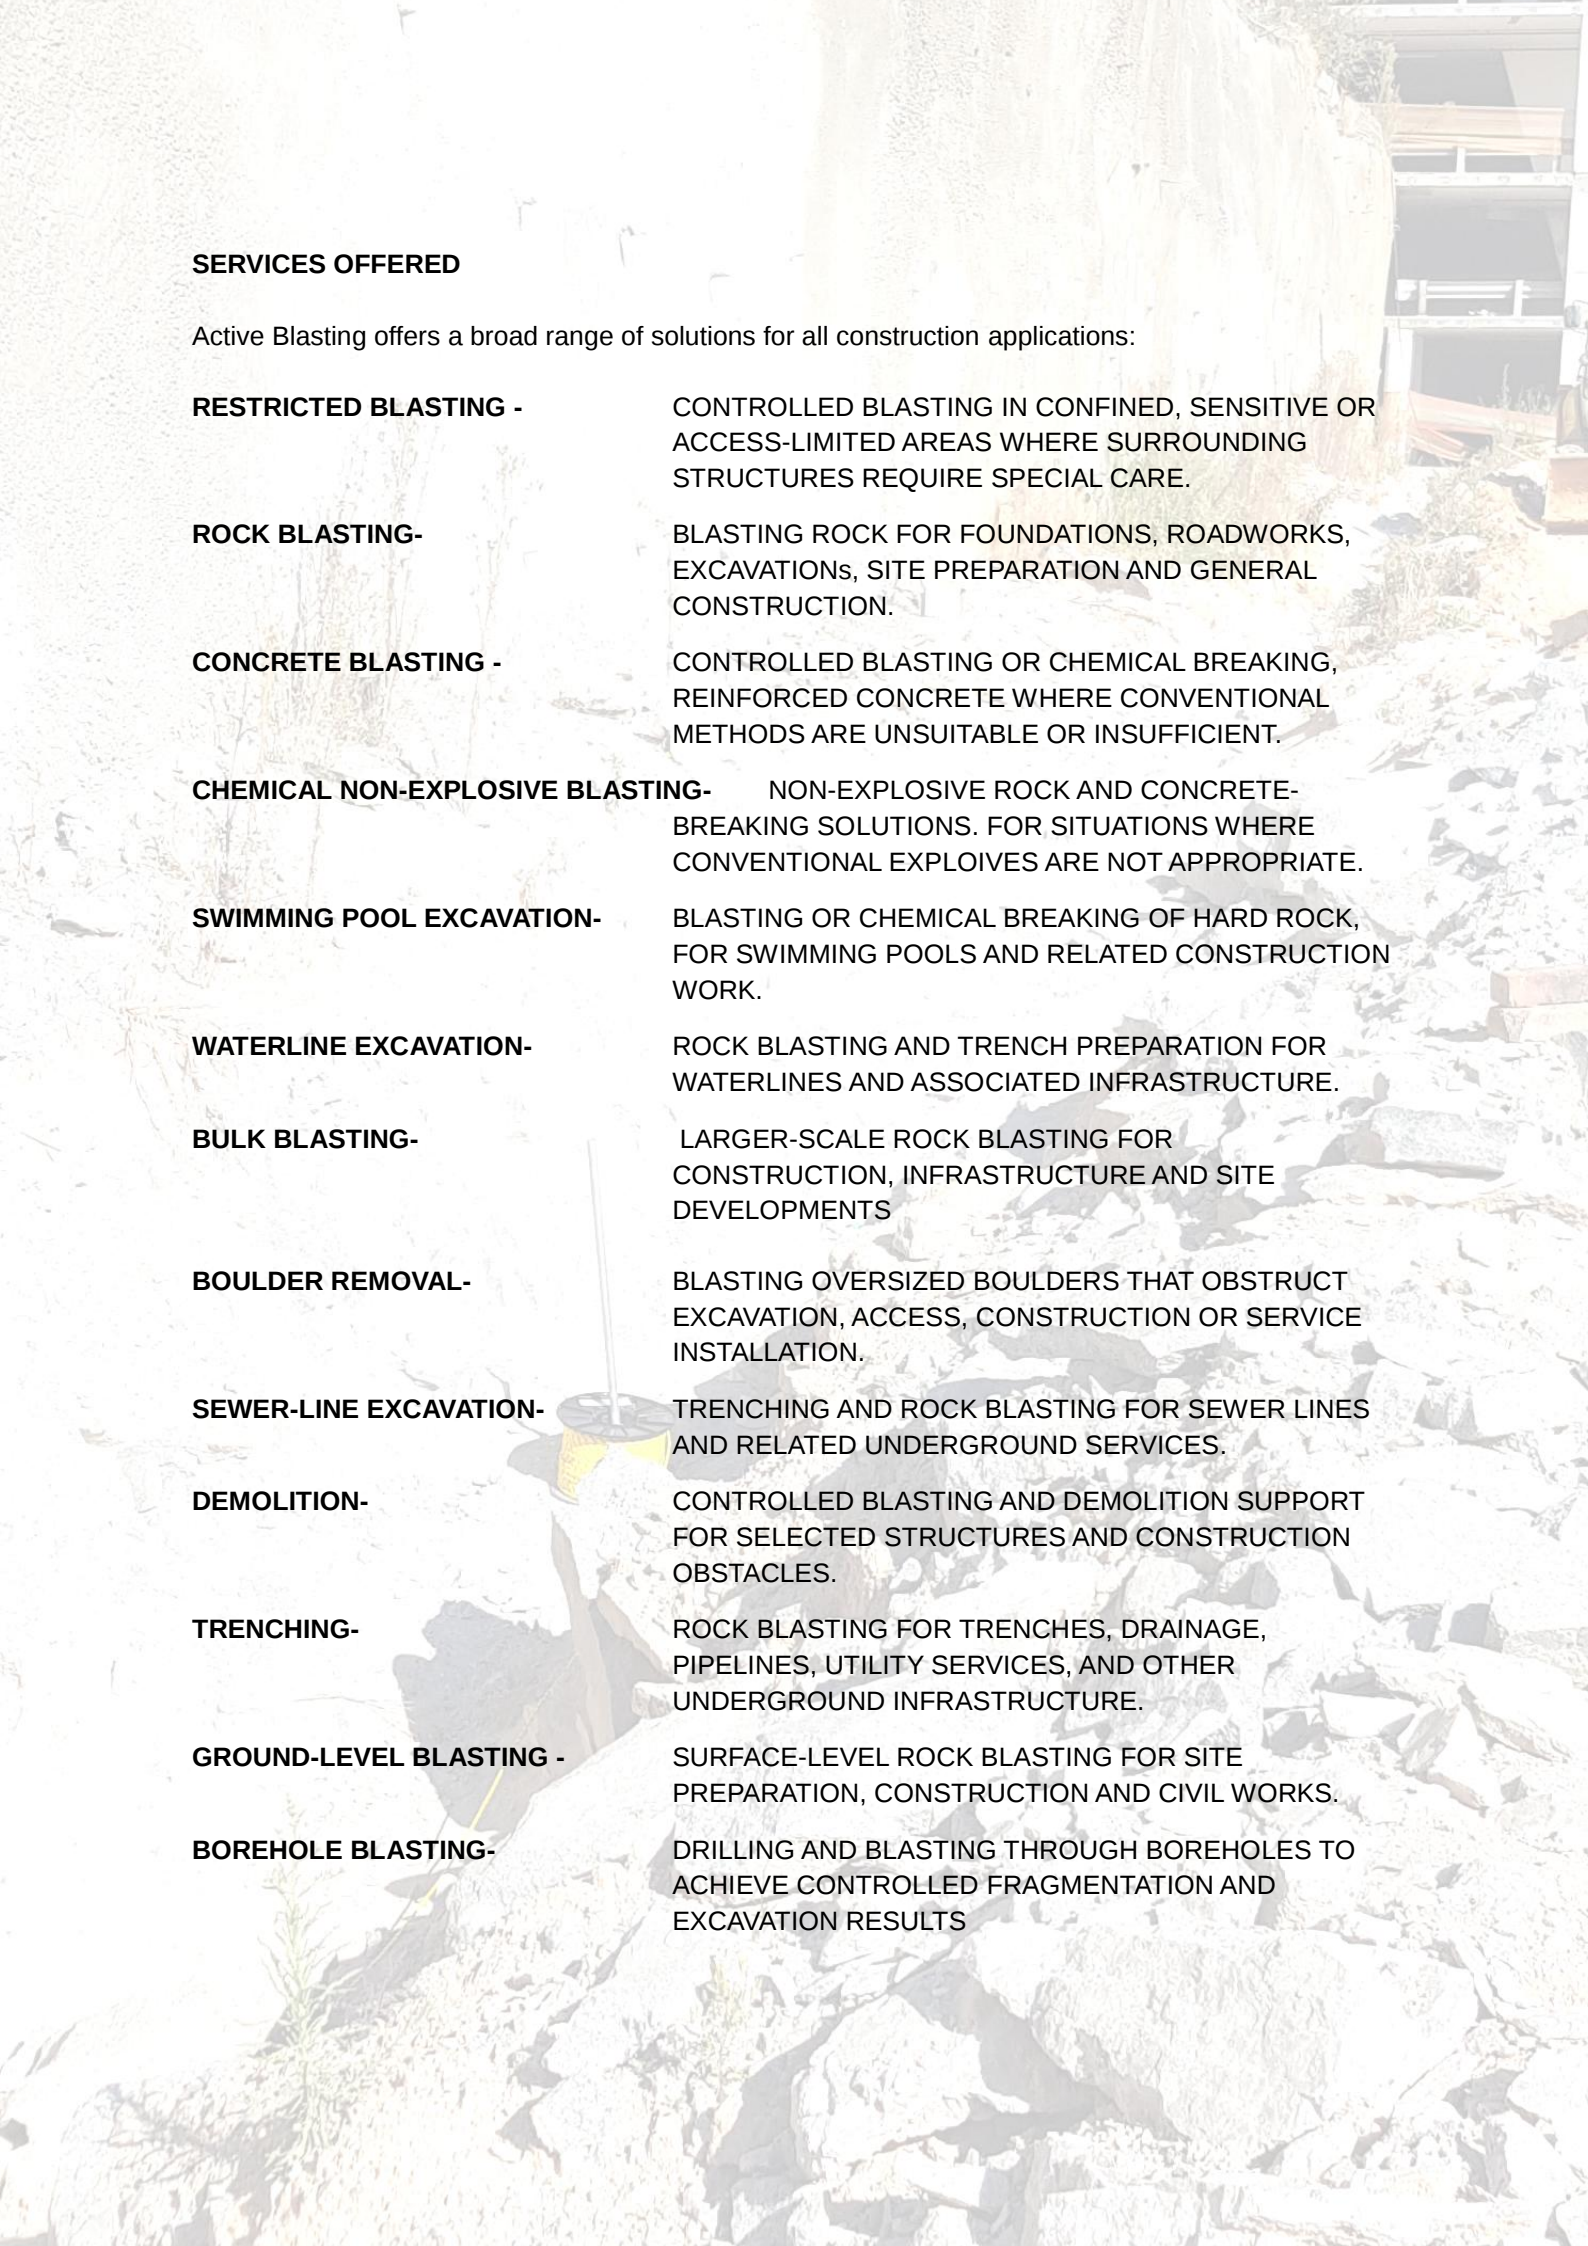

Active Blasting complies with the BOHSS Occupational Health and Safety Act and Regulations 85 of 1993, and have an Explosives Workplace License registered with the Department of Labour's Chief Inspector of Explosives.

Industries and Project Applications

Active Blasting works with contractors and construction teams involved in a wide variety of projects. The company's services are suited to work where hard rock, concrete, boulders, restricted access, existing structures, or underground services create difficult excavation and removal conditions.

Typical applications include foundation and site excavation, swimming pool construction, road and civil works, waterline and sewer-line installations, service trenches. Demolition activities, boulder removal, bulk rock excavation and specialist ground breaking operations,

Whether the requirements is focused in a restricted area, or a larger bulk blasting operation, Active Blasting works to understand the contractor's programme and provide a solution suited to the worksite and desired outcome.

SERVICES OFFERED

Active Blasting offers a broad range of solutions for all construction applications:

RESTRICTED BLASTING -	CONTROLLED BLASTING IN CONFINED, SENSITIVE OR ACCESS-LIMITED AREAS WHERE SURROUNDING STRUCTURES REQUIRE SPECIAL CARE.
ROCK BLASTING-	BLASTING ROCK FOR FOUNDATIONS, ROADWORKS, EXCAVATIONS, SITE PREPARATION AND GENERAL CONSTRUCTION.
CONCRETE BLASTING -	CONTROLLED BLASTING OR CHEMICAL BREAKING, REINFORCED CONCRETE WHERE CONVENTIONAL METHODS ARE UNSUITABLE OR INSUFFICIENT.
CHEMICAL NON-EXPLOSIVE BLASTING-	NON-EXPLOSIVE ROCK AND CONCRETE-BREAKING SOLUTIONS. FOR SITUATIONS WHERE CONVENTIONAL EXPLOIVES ARE NOT APPROPRIATE.
SWIMMING POOL EXCAVATION-	BLASTING OR CHEMICAL BREAKING OF HARD ROCK, FOR SWIMMING POOLS AND RELATED CONSTRUCTION WORK.
WATERLINE EXCAVATION-	ROCK BLASTING AND TRENCH PREPARATION FOR WATERLINES AND ASSOCIATED INFRASTRUCTURE.
BULK BLASTING-	LARGER-SCALE ROCK BLASTING FOR CONSTRUCTION, INFRASTRUCTURE AND SITE DEVELOPMENTS
BOULDER REMOVAL-	BLASTING OVERSIZED BOULDERS THAT OBSTRUCT EXCAVATION, ACCESS, CONSTRUCTION OR SERVICE INSTALLATION.
SEWER-LINE EXCAVATION-	TRENCHING AND ROCK BLASTING FOR SEWER LINES AND RELATED UNDERGROUND SERVICES.
DEMOLITION-	CONTROLLED BLASTING AND DEMOLITION SUPPORT FOR SELECTED STRUCTURES AND CONSTRUCTION OBSTACLES.
TRENCHING-	ROCK BLASTING FOR TRENCHES, DRAINAGE, PIPELINES, UTILITY SERVICES, AND OTHER UNDERGROUND INFRASTRUCTURE.
GROUND-LEVEL BLASTING -	SURFACE-LEVEL ROCK BLASTING FOR SITE PREPARATION, CONSTRUCTION AND CIVIL WORKS.
BOREHOLE BLASTING-	DRILLING AND BLASTING THROUGH BOREHOLES TO ACHIEVE CONTROLLED FRAGMENTATION AND EXCAVATION RESULTS
